WORK EXPERIENCES

Report and Revenue Analyst | Full-time

Jun 2025 - Aug 2026
On-site • Ahmedabad

Technocruitx Universal Services

- Analyzed revenue, sales, and operational data to identify trends, patterns, and performance gaps.
- Prepared daily, weekly, and monthly reports for management using **Excel and ML Models** data analysis techniques.
- Monitored key performance indicators (KPIs) and provided actionable insights to support business decisions, resulting in a **15% increase in sales**.
- Improved reporting accuracy and efficiency by organizing, validating, and interpreting large datasets.

Technologies / Skills Used : Python, Excel, Scikit-learn

PROJECTS

Autonomous Multi-Agent Market Analyst | Github

Jun 2026 - Aug 2026

Lead Developer

- Experienced with building an **autonomous multi-agent equity research system** using LangGraph with specialized Fundamental Analyst, Technical Analyst, and Portfolio Manager agents.
- Developed a financial data pipeline using **Yahoo Finance (yfinance)** and **Pandas** to analyze valuation, profitability, market price, volume, SMA-20, SMA-50, RSI, and 52-week price levels.
- Implemented a **Human-in-the-Loop (HITL)** workflow that pauses before final investment memo generation and requires explicit approval before continuing.
- Used LLM-powered agents to synthesize fundamental and technical analysis into structured, institutional-style **equity research and investment memos**.
- Built a decoupled application using **FastAPI backend + Streamlit frontend**, with LangGraph checkpoint-based state and session management.
- Added input validation, error handling, automated regression tests, CI checks, and **Render-ready deployment configuration** for production-oriented hosting.

Technologies / Tools Used : LangGraph, FastAPI, Streamlit, yfinance

Real-World Travel Planner System | Github

Jul 2026 - Aug 2026

Lead Developer

- Experienced with building a LangGraph-based multi-agent travel planner with Supervisor, Flight, Hotel, Weather, Budget, and Itinerary agents using dynamic routing.
- Added Human-in-the-Loop approval so users can review, approve, or request itinerary revisions before the final travel plan is generated.
- Integrated Tavily MCP, OpenWeather, and AviationStack APIs to enrich itineraries with hotel research, weather insights, and flight-status data.
- Implemented input guardrails and structured validation to block irrelevant or unsafe requests before agents and external tools are triggered.
- Added PostgreSQL-backed LangGraph checkpointing for persistent, resumable sessions, with in-memory fallback for local development.
- Built a Streamlit interface with production-oriented error handling, automated validation, CI checks, and Render-ready deployment support.

Technologies / Tools Used : LangGraph, MCP, PostgreSQL, Streamlit, Live APIs

Enterprise Agentic RAG System | Github

May 2026 - Jul 2026

Lead Developer

- Experienced with building an enterprise-grade **Agentic RAG system** using LangGraph with Planner, Retriever, and Responder agents, conditional routing, conversation memory, and Evaluation Pipeline.
- Implemented **semantic retrieval** using Gemini Embeddings + Qdrant Cloud, enhanced with FlashRank cross-encoder reranking for higher-quality context retrieval.
- Integrated **Portkey LLM Gateway** for centralized LLM routing and production-oriented model gateway management.
- Implemented NeMo Guardrails to protect the RAG pipeline against off-topic queries, prompt injection, jailbreak attempts, and unsafe interactions.
- Built FastAPI + Streamlit interfaces with Logfire/LangSmith observability, RAGAS-based evaluation, automated validation tests, and Render deployment configuration.
- Evaluated the system based on all important metrics like Faithfulness, Answer Relevance, Context Relevance, Answer Correctness, and Answer Completeness and got the best scores close to 87%.

Technologies / Tools Used : Portkey Gateway, Qdrant, Gemini Embeddings, NeMo Guardrails, RAGAS, React

SKILLS

Databases :	PostgreSQL, Qdrant
Frameworks & Libraries :	LangChain, LangGraph, Model Context Protocol (MCP), Agentic AI, Retrieval-Augmented Generation (RAG)
Languages :	English, Hindi
Programming Languages :	Python
Soft Skills :	Deep Learning, Generative AI, Multi-Agent Systems, Guardrails & Input Validation, Human-in-the-Loop (HITL), Workflows, Evaluation Pipelines, Adaptability
Tools & Platforms :	FastAPI, REST APIs, Streamlit, Git, GitHub, Docker, Model Context Protocol(MCP), GitHub Actions

EDUCATIONS

Indian Institute of Technology Madras | Madras

2022 - 2026
CGPA : 8.5

BS in Data Science & AI

Gained practical knowledge in **Agentic AI** and **Generative AI** by building multiple projects to meet industry standards.

ASHA Public School | Kannauj

Apr 2021 - Apr 2022
Percentage : 68

12th CBSE Board

ASHA Public School | Kannauj

2019 - 2020
Percentage : 85

10th CBSE Board
